# All your data in **one place**.

Turn your scattered documents into a powerful, intelligent knowledge base.

DEMO   BOOK A CALL

Universal Data Integration: Ingest and understand any data type. From PDF technical manuals and CSV telemetry to project tickets and CAD file metadata.

Modular & Customizable Pipeline: Define bespoke retrieval strategies, chunking rules, and embedding models optimized for complex aerospace documents.

Flexible LLM Core: Deploy your own private, fine-tuned models or leverage SPAIDER's proprietary Aerospace-Expert LLMs for unmatched domain accuracy.

100% Data Governance: Maintain complete control over your data with a system designed for the highest security standards.

Mission

To empower your team (and future team members) with immediate access to the collective knowledge and experience of your entire organization, ensuring smarter, faster decisions at every level.

TRUSTED ANSWERS, INSTANTLY

Every answer is backed by citations from your own documents, transforming decades of scattered team expertise into a reliable, on-demand asset.

SECURE & INTEGRATED

Deployed on your private cloud or on-premise, ensuring total data privacy and compliance. Seamlessly integrates with your existing data sources.
